

GUIDELINES FOR THE PREPARATION OF EPOSTERS

Eposters for presentation at World Aquaculture events can be prepared as in the past for 'paper' posters in ppt or other or using an alternative layout that focusses on the outputs and messages.

"Golden" rules :

1. Eposters should be ONE single page. Height 38 In (960 mm), width 21 in (540 mm) in PORTRAIT. Your ePoster will be shown at the meeting on a large 16 x9 video screen in the portrait orientation.
2. Compress images in the Eposter before saving to PDF and select "online" version, to keep the file size as small as possible (ideally 5MB).
3. All Eposter presenters must register for the event.
4. After registration, you will receive instructions on how and where to upload your Eposter to the event website.

Traditional layout

Traditionally, posters include a title, names of authors and their addresses, abstract, introduction materials and methods, results, discussion (or a combined results and discussion), conclusion, acknowledgments (if any), references, tables, and figures. They are arranged in more or less equal proportions to fill up the dimensions of the poster. The image on the right shows how the use of colour can enhance the poster.

An alternative layout that focusses on main outcomes.

In this format, only the main outcome is focussed. The other elements of the poster are listed as bullets, with graphs and figures appearing in a side panel (an ammo bar) for reference if needed. A QR code then links back to fuller information.

**Main finding goes here,
translated into plain English.
Emphasize the important words.**

Title goes here; make it small if you need to free up space.

✉ Leeroy Jenkins, author2, author3, author4

INTRO

- Just give context for the gap you're filling
- You're not going to get yelled at if you don't cite the 5 papers from 1937 that defined this construct. They'll download your paper if they want that.

METHODS

1. $N = \#\#$,
2. Collected this
3. Tested with X statistical test

RESULTS

- Graph or table with essential results only.
- All the other correlations in the ammo bar.

DISCUSSION

- "If this result actually generalized and I didn't have to humbly disclaim the possibility of a thousand confounds and limitations, it would imply that...."

Keep font size as high above 28 as possible.

AMMO BAR

Delete this and replace it with your...

- Extra Graphs
- Extra Correlation tables
- Extra Figures
- Extra nuance that you're worried about leaving out.
- **Keep it messy!** This section is just for you.

SUBMITTING / UPLOADING YOUR EPOSTER

Please submit your poster when you receive notification and instructions from the Conference Director.

- You can only submit your ePoster after you have registered for the meeting.
- Create a PDF file of your poster. The layout should be in the 16 x 9 aspect ratio in the portrait orientation
- File size should be no larger than 8GB in size.
- Open a browser and navigate to <https://was.org/meeting/ePoster>
- Click the “Submit Your Poster” button at the bottom of the page
- Enter the email address used as the primary author when the abstract was submitted
- Click the “Search for Papers” button
- Select the title of the ePoster that you are submitting
- Upload the file for your ePoster
- Once the upload is successful, you will see a thumbnail image of your ePoster. Don’t be alarmed if this thumbnail is a bit pixelated. Your ePoster will be saved in full resolution.
