

AFRAQ24 Special Session

"Advances in Sustainable Development of Aquaponics and Integrated Multi-Trophic Aquaculture (IMTA)"

Abstracts are invited on the most up-to-date research and commercial approaches and advances in Aquaponics, Sandponics and Integrated Multi-Trophic Aquaculture (IMTA) technologies. New horizons in integrated culture technology for salt- and fresh-water species grown in land-based systems and in coastal environments will be presented in this session.

Session Chair: Prof. Kevan Main - kmain@mote.org
